

## **Current Sensor Bus Bar Type**

battery made simple

Remote Monitoring ready ふ

Reviewed by I.R.R on 2024-April-16

Product Code: CS013A

#### Introduction

The Bus Bar type of EMUS G1 Dual Range Current Sensor is designed specifically for use in battery packs that consists of prismatic form factor cells. It doubles as an interconnecting bus bar, and due to the galvanic isolation between the sensor and the conducting part, it can be installed anywhere in the battery pack between two adjacent, series-connected cells.

## Applications

- High power batteries requiring high current draw
- Specifically designed to be used in EMUS battery management system
- EMI can affect to the current sensor, and it is also recommended to calibrate it once installed
- Under frequent high currents, recalibration maintenance could be needed

#### Features

- Two separate measurement channels with different sensitivity, which allows to accurately measure small currents without sacrificing the range of measurable values
- Hall-effect current measurement method which provides the characteristic galvanic isolation between the sensor and the conductive part

#### Measurement Direction

The Bus Bar Type Current Sensor is intended to measure positive current in the direction detailed in the picture below. It is possible to change the direction parameter using EMUS G1 Control Panel. Charging currents must always be perceived as Positive by the current sensor for correct functioning.

### Other specifications

#### Table 3. CS013A other specifications

Item	Value
Operating temperature	-40 to +85 °C
IP rating	IP40
Weight	98 g
	1. Open EMUS Control Panel (from version 2.7)
	2. Check for correct Sensor Type
	3. To Calibrate L value
Sensor calibration procedure	4. Run constant current from 30 up to 70A
	5. Make sure you connect current measurement device to measure actual value
	6. Press Calibrate L value, enter momentary current value from measurement device
	7. Make same process for H Value, only run current of more than 130A
Default calibration values	L: 2340 / H: 22500
